

# CHARLES PINE

charlespine22@gmail.com | 224-944-3640 | Spring, TX 77379

---

## Summary

A User-minded Web Developer that prioritizes usability and adaptability during projects. Designs sites and apps to attract users with aesthetically pleasing interfaces and exceptional UX elements. Comfortable working within large-scale collaborations or on individually-developed assets.

---

## Work Experience

### Full Stack Developer

12/2021 - 07/2022

Astroworld.io | Houston, TX

- Managed both back-end and front-end aspects of development process.
- Contributed back-end development experience and collaborated on multiple APIs crucial to functionality.
- Designed and implemented reusable components.
- Collaborated with UI and UX personnel to develop friendly and usable websites and web-based software.

### Receiver

04/2019 - 03/2021

Whole Foods | Spring, TX

- Maintained work areas and kept organized.
  - Put merchandise in assigned area, added tags and secured larger pieces as required.
  - Utilized correct and safe operating procedures when using equipment such as forklifts and pallet jacks to load, unload and move materials.
- 

## Projects

### Portfolio | *HTML, CSS, Javascript*

My personal portfolio showcasing project's that I've worked on. One of the main challenges for this project was figuring out how to host the website without losing functionality in the contact form. This challenge was overcome by using Netlify with a third-party website "Formspree", to maintain functionality.

.

### Retro Chat Application | *ReactJS, Node.JS, HTML5, CSS, JSON, Express, Firebase, MongoDB, RestAPI*

A React application heavily based and influenced off of the old Aim(AOL Instant Messenger) chat application. It uses Chat Engine and Firebase for the backend

**Github:** <https://github.com/CharliePine22/retro-chat-application>

.

### Video Game Database | *NextJS, Node.JS, MongoDB, HTML, CSS, RestAPI, OAUTH, SteamAPI, RawGLO*

A video game database that allows users to track the video games they've: opened, wanted, or played. The user can then rank and sort their games, as well as fetch their steam library and get their stats on a specific game.
